

APOLLO SHINE

LICET and Apollo Hospitals have signed an MoU in July 2015 – regarding health insurance for the students of LICET. Apart from taking care of emergency, Apollo SHINE would have wellness center at LICET with two nurses stationed, during class hours, for the health needs of students.

The Apollo SHINE initiative has a clear objective of taking the tenets of healthy living to our colleges, and to sow the seeds of knowledge for good health among the youth of India when they are at their most impressionable age. With Apollo SHINE, we aim to inculcate habits of discipline, focus and moderation that will lead to a lifetime of good health.

We aspire to create young ambassadors of wholesome living who will catalyze a healthier dawn for our country. Special emphasis will be placed on nutrition, exercise and wellbeing. Apollo SHINE is a comprehensive programme that will seek to identify and treat common health problems at an early stage, as well as be completely equipped to handle all sorts of medical emergencies that might arise in the college environment. SHINE consists of three well defined health care programs:

1. SHINE Comprehensive Health Checks at college:

A comprehensive, yet non intrusive programme which ensures that every student and staff receives an annual health check-up from a trained professional. All records pertaining to general health, results from the check-up and other connected information will be maintained for all.

2. SHINE Health Insurance and Health Training:

With SHINE, you get all the essentials of healthcare as in the basic programme as well as the added benefits of Health Insurance plus special annual health training for students and staff.

While accidents among students are common, a health insurance plan designed for such eventualities is a rarity! SHINE provides a one year renewable Accidental Insurance Cover for up to Rs. 100, 000/- towards inpatient hospital expenses.

Trained professionals from Apollo will offer First Aid and Basic Life Support Training to the students and staff. An invaluable service which empowers teachers and other school staff with the ability to save a life during a medical emergency. It is a life skill that all of us must have! Those attending this annual training session will receive a certification from Apollo.

3. SHINE Wellness centre:

In addition, SHINE offers the incredible benefit of a wellness room in the college. Well trained Apollo Hospital's nurse/paramedic will be stationed at the Wellness room, and he/she will ensure that students get immediate attention and first aid. In case of a medical emergency the paramedics will immediately summon a special ambulance. While the Wellness room takes care of a student's physical health, trained health professionals will be present during health checks and health talks, to counsel the students and help them to handle stress, adolescent issues including emotional and behavioral problems.
